Commissioner for Patents United States Patent and Trademark Office P.O. Box 1450 Alexandria, VA 22313-1450 www.uspro.gov

BEFORE THE BOARD OF PATENT APPEALS AND INTERFERENCES

Paper No. 703

Application Number: 09/824,167

Filing Date: April 02, 2001 Appellant(s): RUEGER ET AL.

Richard L. Mayer For Appellant

EXAMINER'S ANSWER

This is in response to the appeal brief filed June 11, 2003.

(1) Real Party in Interest

A statement identifying the real party in interest is contained in the brief.

(2) Related Appeals and Interferences

The brief does not contain a statement identifying the related appeals and interferences which will directly affect or be directly affected by or have a bearing on the decision in the pending appeal is contained in the brief. Therefore, it is presumed that there are none. The Board, however, may exercise its discretion to require an explicit statement as to the existence of any related appeals and interferences.

(3) Status of Claims

The statement of the status of the claims contained in the brief is correct.

(4) Status of Amendments After Final

The appellant's statement of the status of amendments after final rejection contained in the brief is correct.

(5) Summary of Invention

The summary of invention contained in the brief is correct.

(6) Issues

The appellant's statement of the issues in the brief is correct.

(7) Grouping of Claims

Appellant's brief includes a statement that claims of Group 1, claims 1-6, 8-17 and 19-38, and of Group 2, claim 7 do not stand or fall together and provides reasons as set forth in 37 CFR 1.192(c)(7) and (c)(8).

(8) Claims Appealed

The copy of the appealed claims contained in the Appendix to the brief is correct.

Application/Control Number: 09/824,167 Page 3

(9) Prior Art of Record

0 871 230 Reineke et al. 10-1998

5,862,431 Crhistensen 1-1999

(10) Grounds of Rejection

The following ground(s) of rejection are applicable to the appealed claims:

Claims 1-6, 8-17 and 19-38 rejected under 35 U.S.C. 102. This rejection is set forth in prior Office Action, Paper No. 10.

Claim 7 is rejected under 35 U.S.C. 103(a). This rejection is set forth in prior Office Action, Paper No. 10.

Note that the USC 112 rejections are hereby withdrawn by the Examiner.

(11) Response to Argument

In addition to what is cited above, note that Figures 1 and 6-8, among others, of Reineke et al. show the circuits and charging and discharging of the piezoelectric elements in a time sequence and that these figures are identical to those of the Applicants' figures 1 and 6-8. The Applicants' figures 6 and 8 are methods of driving the circuits of figures 1 and 7, respectively. The Applicants note in their descriptions of the figures at pages 11 and 12 of the disclosure that these figures show the circuits and method of operations according to the present invention. Figures 6 and 8 involve application of current to the switches shown by the sinusoidal waveforms. Some event triggers the discharge which begins at 400 us (e.g. in fig. 6), as such both the charging and discharging occur over time, and an inherent event which causes the switching to

allow both to occur exists. Given the identical structures, the goal of the Applicants that they achieve an effective low average current is inherently met by the Reineke et al. reference.

For the above reasons, it is believed that the rejections should be sustained.

Respectfully submitted,

Thomas M. Dougherty, Primary Examiner, Art Unit 2834
